# MINERAL COMPOSITE

## NEW TECHNOLOGY IN YOUR BATHROOM

Mineral Composite Structure

75%  
dolomite stone

25%  
resin

### MINERAL COMPOSITE STRUCTURE

The combination of dolomite and elastic resin imparts unparalleled durability and impact-resistance to Mineral Composite.

The resin also provides unlimited possibilities for moulding products made from this technology. The external surface is covered with nanocoat. This type of coating is also applied to the surface of yacht hulls and wind turbine blades – places exposed to constant contact with the elements: wind and water.

Its main constituent is calcium and magnesium carbonate –  $\text{CaMg}(\text{CO}_3)_2$  – a snow-white mineral with a crystalline structure.

Mineral Composite is a material that fully utilises the extraordinary properties of dolomite.

Thanks to technology developed by Marmite, rock that was formed millions of years ago is turned into resistant and beautiful modern products.

## MODULAR FURNITURE

EVEN MORE SPACE FOR YOU

### SOFT CLOSE

Silent closing system provides comfortable and safe use of doors and drawers.

### CAPACIOUS DRAWERS

By adapting the design for a space-saving siphon, we get even more storage space.

### GLASS SHELVES

Aesthetic and practical solution, emphasizing the elegant character of the cabinet.

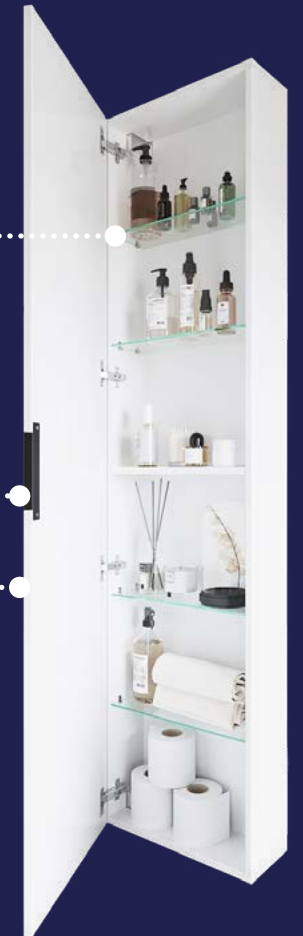

### METAL HANDLES

Durable and ergonomic, provide good grip and easy opening.

### MDF FURNITURE FRONTS

Extremely durable resistant to mechanical damage.

EMPORIA furniture was created for your comfort of use. They will perfectly fit into the space of any even the smallest bathroom.

LOOP, RIO and MOLTO series, are designer products with incredible durability, ensured by the use of high-quality materials, i.e. special light-cured varnish on the body and front of each piece of furniture, and acrylic anti-finger coating on the tops. Thanks to the wide range of combining bodies, you will create your perfect set.
